Fluid Phase Equilibria, 90 (1993) 401–402
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 90 (1993)

Volume 90, No. 1

Evaluation of Wohl parameters in binary systems
J. Wisniak and A. Apelblat (Beer-Sheva, Israel) 1–13
The influence of gas–gas interactions on the Langmuir constants for some natural gas hydrates
B. Kvamme (Porsgrunn, Norway), A. Lund and T. Hertzberg (Trondheim, Norway) 15–44
The limiting behaviour of the Simplified-Perturbed-Hard-Chain Theory at high temperatures
A. van Pelt (Delft, Netherlands), U.K. Deiters (Bochum, Germany), C.J. Peters and J. de Swaan Arons (Delft, Netherlands) 45–56
Thermodynamic behavior of electrolyte solutions. Part I. Activity coefficients and osmotic coefficients of binary systems
C.-L. Lin (Taipei, Taiwan), L.-S. Lee (Chungli, Taiwan) and H.-C. Tseng (Taipei, Taiwan) 57–79
Thermodynamic behavior of electrolyte solutions. Part II. Prediction of vapor–liquid equilibria for mixed-solvent electrolyte systems
C.-L. Lin (Taipei, Taiwan). L.-S. Lee (Chungli, Taiwan) and H.-C. Tseng (Taipei, Taiwan) 81–98
The chemical potential and thermodynamic equilibria in interfacial mass transfer systems
Y. Zimmels (Haifa, Israel) 99–124
High pressure vapour–liquid equilibrium in the carbon dioxide–α-pinene system
J. Pavlíček (Prague, Czech Republic) and M. Richter (Ústí n. Labem, Czech Republic) 125–133
Vapour–liquid equilibrium in the carbon dioxide–*p*-cymene system at high pressure
Z. Wagner and J. Pavlíček (Prague, Czech Republic)..... 135–141
Vapour pressures of some ethyl and propyl esters of fatty acids
J. Fárková and I. Wichterle (Prague-Suchdol, Czech Republic) 143–148
Fluid phase equilibria of binary and ternary mixtures of supercritical carbon dioxide with low-volatility organic substances up to 100 MPa and 393 K: cosolvency effects and miscibility windows
A. Kordikowski and G.M. Schneider (Bochum, Germany)..... 149–162
Vapour pressure isotopy and hydrogen bonding of ring-deuterated cyclopropylamines
H. Wolff (Heidelberg, Germany), W. Kimizuka and J. Szydlowski (Warsaw, Poland)..... 163–175
Simultaneous determination of vapor–liquid equilibrium and molar volumes for coexisting phases up to the critical temperature with a static method
B. Bian, Y. Wang, J. Shi (Nanjing, China), E. Zhao and B.C.-Y. Lu (Ottawa, Ont., Canada)..... 177–187

Correlation and prediction of the vapor–liquid equilibria of the binary and ternary systems involved in MTBE synthesis
A. Vetere, I. Miracca and F. Cianci (San Donato Milanese, Italy) . 189–203

Volume 89, No. 2

Prediction of Henry's constants by the UNIFAC-FV model for hydrocarbon gases and vapours in high-boiling hycrocarbon solvents
M. Stelmachowski and S. Ledakowicz (Lodz, Poland) 205–217
A modified Clausius equation of state for calculation of multicomponent refrigerant vapor–liquid equilibria
A.S. Gow (West Haven, CT, USA) 219–249
Use of the velocity of sound in predicting the PVT relations
M.R. Riazi and G.A. Mansoori (Chicago, IL, USA) 251–264
Endothermic character of toluene adsorption from supercritical carbon dioxide on activated carbon at low coverage
F. Recasens, E. Velo, M.A. Larrayoz and J. Puiggené (Barcelona, Spain) 265–287
New forms of McKay–Perring equations for mixed electrolyte solutions
H. Pan and S. Han (Hangzhou, China)..... 289–306
On statistical mechanical equations of state for simple fluids. Effective hard spheres and quantum corrections
S. Nordholm, H. Greberg and R. Penfold (Gothenburg, Sweden).. 307–332
Liquid–liquid phase equilibria of aqueous two-phase systems containing salts and polyethylene glycol
N. Voros, P. Proust and A. Fredenslund (Lyngby, Denmark) 333–353
Vapour–liquid equilibria in nonpolar mixtures. II. Carbon tetrachloride with alkylbenzenes and *n*-alkanes at 313.15 K
M. Góral and S. Zawadzki (Warsaw, Poland)..... 355–364
Measurements of (p, ρ, T, x) for $\{xCS_2 + (1-x)Si(CH_3)_4\}$(l) from 198 to 298 K and pressures up to 104 MPa. Experimental results and derived thermodynamic properties
J.E.F. Rubio, V.G. Baonza, M. Caceres and J. Nuñez (Madrid, Spain)..... 365–387
Phase equilibria of narrowly distributed dextranes in the ternary system dextrane–water–ethanol
C. Neuchl and A. Mersmann (Munich, Germany) 389–398
